Creative Interventions for Children and Families Coping with Loss

This dynamic workshop will present an innovative model for working with children and families coping with loss. Structured assessment and treatment techniques will be illustrated for use in individual, group, and family therapy. Participants will come away with many innovative techniques. Although the focus will be on bereavement, divorce, and foster care, interventions can be adapted for use with a variety of other populations.

Creative Family Therapy Techniques

The use of play, art, and other creative activities in family therapy provides a medium for all members to participate in sessions and facilitates family relatedness. Through this dynamic workshop, participants will learn a number of innovative techniques to engage, assess, and treat families. This will include art, games, puppets, drama, and stories. The advantages of using creative techniques with families will be outlined, and tips for overcoming challenges will be discussed. Videos and live demonstrations will be used to illustrate techniques.
